Effects after the transaction	
Growth in DPU (Note 2)	Mid-long term estimate +140 yen/period
Decrease in average age (Note 3)	-28.8 years
Gains on sales of properties secured (Note 4)	31st fiscal period (2020/10) +1.0 bn yen 32nd fiscal period (2021/4) +1.1 bn yen
Increase in retained earnings	31st fiscal period (2020/10) +700 mn yen 32nd fiscal period (2021/4) +600 mn yen

Note 1: The yield for property to be acquired is calculated by dividing the annualized NOI after depreciation (estimate) calculated by the Asset Management Company excluding extraordinary factors for the acquisition year by the anticipated acquisition price. The yield for the properties to be sold is calculated by dividing the sum of the rental operating income (NOI after depreciation (actual)) for the 29th (2019/10) and 30th (2020/4) fiscal periods by the anticipated sale price

Note 2: Calculated by deducting the estimated costs for borrowing (9.7 billion yen) to allocate funds for acquisition and the sum of the rental operating income of the properties to be sold in 30th fiscal period (2020/4) from the NOI after depreciation (estimate) of the property to be acquired and then dividing the value by the total number of investment units issued and outstanding as of the end of the 30th fiscal period (2020/4) (truncated to the nearest ten yen)

Note 3: Calculated by deducting the weighted average age of the properties to be sold at acquisition price from the age of the property to be acquired as of June 30, 2020

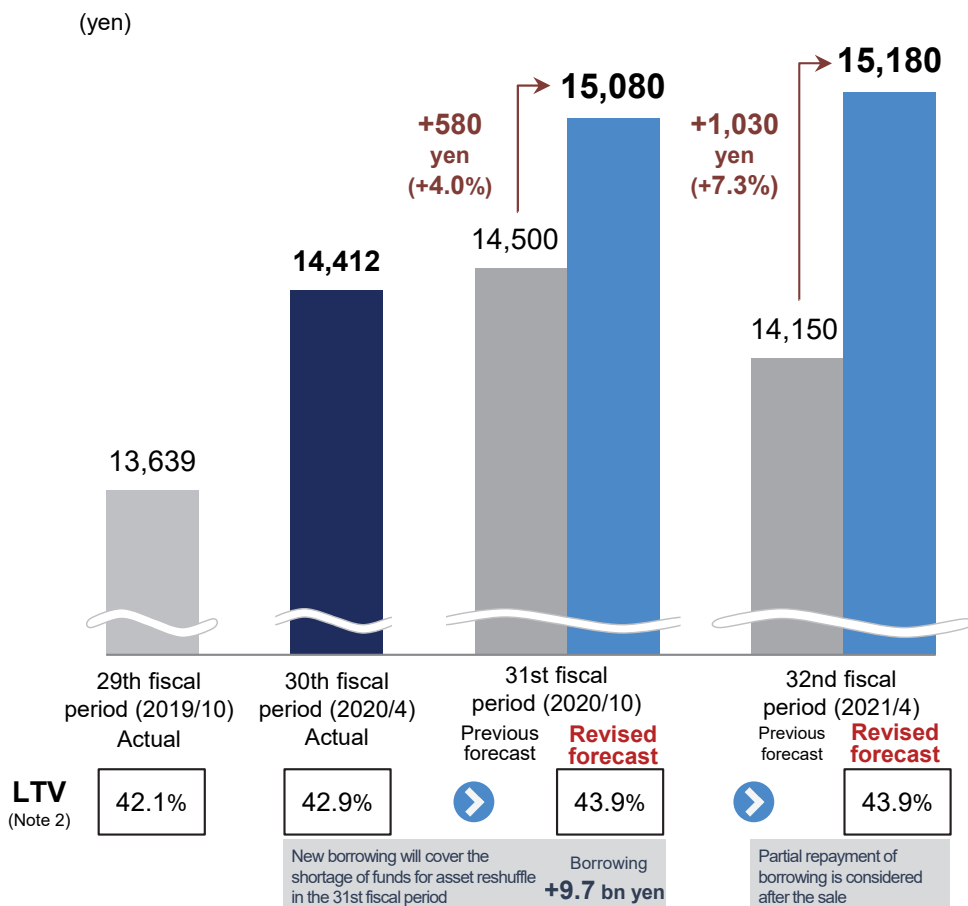

Note 4: Gains on sales of properties are estimated based on the estimated book value and selling expenses, etc.

Dividend and reserve for reduction entry

Highlight of revised forecasts

- Dividend is expected to significantly exceed the previous forecast amount, with part of the gain on sale being distributed
- Seek to maximizing retained earnings utilizing the special taxation measure applicable up to the 32nd fiscal period
- Increase both DPU and retained earnings to be fully prepared for uncertainties in the business environment

Changes in DPU (Note 1)

Changes in balance of reserve for reduction entry (Note 3)

Note 1: Figures per unit are calculated based on the number of investment units issued and outstanding as of the end of each fiscal period (the same applies hereinafter)

Note 2: LTV for the 31st (2020/10) and 32nd (2021/4) fiscal periods are calculated by dividing the outstanding interest-bearing debt (estimate) as of the end of the relevant fiscal period by the total asset (estimate) based on the implementation of asset reshuffle announced today (rounded to the first decimal place)

Note 3: The forecast balance of the reserve for reduction entry is calculated by adding the estimated provision of reserve for reduction entry for each fiscal period to the estimated balance of reserve for reduction entry on the balance sheet as of the end of the 30th fiscal period (2020/4)
