The Acquisition is implemented with the support by the sponsor to purchase a property that is relatively new and located in the center of Tokyo through transactions based on a negotiations. The Transactions will be a reshuffle of properties through sale of the Sold Properties, which are aging relatively, to Mitsui Fudosan Co., Ltd. and acquisition of a relatively new property located in the center of Tokyo with excellent building specifications. The Investment Corporation's particular expertise from accumulating a track record of improving the portfolio by reshuffling properties in the portfolio to date is fully demonstrated in the Transactions.

The Investment Corporation will continue to involve strategic reshuffling of properties in the portfolio.

By implementing the Acquisition and a portion of the Sale first and then implementing sale of the KDX Shin-Nihonbashi Building portion of the Sale later, rental revenue from the Acquired Property can be earned earlier and rental revenue from some of the Sold Properties can also be secured for a certain period.

The Acquired Property is categorized as a mid-sized office building that the Investment Corporation has focused on as the main investment target, and the following characteristics were evaluated in determining to acquire it.

### (1) Location

The Shimbashi area, where the Acquired Property is located, boasts excellent traffic convenience and has long had needs from tenants of various industry and business types and of all sizes, developing as one of the leading representative office areas of Tokyo.
